IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER
BEAVER CREEK SCHOOL PWS# AZ0413084
Has Levels of Arsenic Above Drinking Water Standards

Our water system Beaver Creek School recently violated a drinking water standard. Although this is not an emergency, as our customers, you have a right to know what happened, what you should do, and what we did (are doing) to correct this situation.

We routinely monitor the presence of drinking water contaminants. Sampling was missed for 3rd & 4th qtrs. 2023. Testing results we received on 2/21/24 show that our system exceeds the standard, or maximum contaminant level (MCL), for arsenic. The standard for arsenic is 10 parts per billion (ppb). The average level of arsenic over the last year has been 21 ppb.

What should I do?

You do not need to use an alternative (e.g. bottled) water supply. However, if you have specific health concerns, consult your doctor.

What does this mean?

This is not an immediate risk. If it had been you would have been notified immediately. Some people who drink water containing arsenic in excess of the MCL over many years could experience skin damage or problems with circulatory system, and many have an increased risk of getting cancer.

What is being done?

The school district is working with our water operator, ADEQ, and the Az School Facilities Div. to create a long term plan to correct this deficiency. Temporary POU's were installed in Sept 2023 until the permanent filtration unit is constructed.

For more information, please contact Karen DuFresne or Ori Womack at 928-567-4631 or at Beaver Creek School District 4810 E. Beaver Creek Rd. Rimrock, Az 86335
