

Compost Recipe

Composting is nature's way of recycling!

Ingredients:

Browns

Dry leaves

Twigs

Straw

Sawdust

Newspaper & Junk Mail

Greens

Grass Clippings

Landscape Trimmings

Vegetables

Fruit Peels

- ◆ Blend green material.
- ◆ Blend brown material.
- ◆ Layer greens and browns in a composting bin in the yard.
- ◆ Do not let the pile get too dry - it should be as moist as a wrung-out sponge. Add water regularly in dry weather. The pile may need to be covered in wet weather.
- ◆ Turn the pile weekly, but keep layering greens and browns, always keeping the greens covered with browns.
