

# Air Quality Flag Program

**WHAT IS THE ADEQ AIR QUALITY FLAG PROGRAM?**

The Air Quality Flag Program uses nautical-style flags, based on the Environmental Protection Agency's (EPA) Air Quality Index (AQI), to notify the public of air quality conditions. Flag programs have been successful in the Maricopa, Pima, Pinal, Yuma, and Santa Cruz Counties. The programs fly flags that match warning levels of the AQI.

**WHY WAS THE FLAG PROGRAM DEVELOPED?**

The purpose of this program is to create public awareness of outdoor air quality conditions so people can modify their behavior to reduce exposure to pollutants. Air quality affects how we live and breathe. Children (including teenagers) are at greater risk from air pollution because their lungs are still developing and they breathe more air per pound of body weight than adults. Chronic exposure to even moderate levels of pollutants may decrease lung function. Therefore, reducing exposure to outdoor air pollutants is a simple way to protect children.

**WHAT IS THE AIR QUALITY INDEX?**

The AQI tells you how polluted the air is and what associated health effects might be a concern for you. The AQI focuses on health effects you may experience within a few hours or days after breathing polluted air. ADEQ provides AQI forecasts for ozone, PM10 (coarse particulate matter), and PM2.5 (fine particulate matter), which are major air pollutants regulated by the Clean Air Act. For each of these pollutants, the EPA has established National Air Quality Standards to protect public health.

**WHAT DO THE FLAG COLORS REPRESENT?**

The flags represent different pollutants during different times of the year. From March through October, the flags will typically be for ozone. From October to March, the flags will typically be for particulate matter. If a High Pollution Advisory is issued for both ozone and particulates, the school will fly the flag that protects the greater at-risk population.

**WHERE ARE THE FLAGS POSTED?**

The flags will be posted at participating schools and/or community centers in an area visible to the public.

**WHAT SHOULD I DO IF THE FLAG SHOWS THAT THE AIR QUALITY IS POOR?**

If your child has asthma or other respiratory ailments, you should consult with the school nurse or the individual responsible for administering the Flag Program. The administrator or nurse will be able to provide you with the appropriate information so you may act accordingly to the air quality level.

**GREEN** - air quality is good.

**YELLOW** - air quality is fair.

**ORANGE** - air quality is approaching unhealthy.

**RED** - air quality is unhealthy.
