

Wellhead Integrity Checklist
Recommended for use with Monitoring Waiver Applications

Introduction: General Information

PWS Name:	PWS ID#:
------------------	-----------------

The integrity of your Wellhead is important in order to maintain low risk of contamination to your water quality. Once a drinking water source becomes contaminated, clean-up is difficult and expensive. Contamination of groundwater can result in poor drinking water quality, loss of a community’s drinking water supply, high clean-up costs, high costs for providing alternative drinking water supplies, and potential community health problems. Even low levels of contamination can create health problems in especially susceptible members of the community. Maintaining the integrity of your Wellhead is an important and cost effective step in preventing these types of contamination.

Well Registration Number (ex. 55-#####):

Wellhead Integrity Checklist

	YES	NO
Does the Well site have a building or a security fence that is properly locked and secured?	<input type="checkbox"/>	<input type="checkbox"/>
Is the area around the Well properly graded for drainage and is the site clean?	<input type="checkbox"/>	<input type="checkbox"/>
Does the well slab direct water away from the Well? Is the slab free of cracks or defects?	<input type="checkbox"/>	<input type="checkbox"/>
Is the Well sanitary seal intact?	<input type="checkbox"/>	<input type="checkbox"/>
Is there a Well vent installed and is the vent protected with a #16 non corrodible mesh screen?	<input type="checkbox"/>	<input type="checkbox"/>
Does the Well vent turn down and terminate at least 2 ft. above the slab?	<input type="checkbox"/>	<input type="checkbox"/>
Is the Well pressure relief valve operational?	<input type="checkbox"/>	<input type="checkbox"/>
Does the Well have a raw water sampling tap installed prior to treatment or disinfection?	<input type="checkbox"/>	<input type="checkbox"/>
Does the Well casing extend 12” above the slab?	<input type="checkbox"/>	<input type="checkbox"/>
Is the Well’s ADWR register number (55-XXXXXX) posted at the Well site?	<input type="checkbox"/>	<input type="checkbox"/>
Is the vegetation around the Well site properly maintained?	<input type="checkbox"/>	<input type="checkbox"/>
