

**Routine Quarterly RTCR Monitoring Form**  
 Non- Community Water Groundwater Systems with 1,000 people or less Only

**Part 1: General Public Water System (PWS) Information**

<b>LTF#</b> (to be filled out by ADEQ):	<b>Application Date:</b>
<b>PWS Name:</b>	<b>PWS ID#:</b>
<input type="checkbox"/> <b>This system is choosing to remain on Monthly RTCR monitoring at this time.</b> (skip to part 3)	

**Part 2: Source Information**

List all water sources connected to the system below: (Attach additional paper to form if more room needed)

Well Name	ADWR Number (55-)	Latitude/Longitude

Are any sources within 50 feet from existing sewers/sewer mains? If yes:	<input type="checkbox"/> Yes <input type="checkbox"/> No
Are water main pipe(s), pressure tested in place to 50 PSI without excessive leakage*, used for gravity sewers at distances greater than 20 feet from drinking water wells?	<input type="checkbox"/> Yes <input type="checkbox"/> No
Are water main pipe(s), pressure tested in place to 150 psi without excessive leakage*, is used for pressure sewers and force mains at distances greater than 20 feet from water wells.	<input type="checkbox"/> Yes <input type="checkbox"/> No
Are any sources within 100 feet of any existing septic tank or subsurface disposal system?	<input type="checkbox"/> Yes <input type="checkbox"/> No
Are any sources within 100 feet of a discharge or activity which is required to obtain an Individual Aquifer Protection Permit, pursuant to A.R.S. §§ 49-241(A) through 49-251?	<input type="checkbox"/> Yes <input type="checkbox"/> No
Are any sources within 100 feet of an underground storage tank as defined in A.R.S. § 49-1001?	<input type="checkbox"/> Yes <input type="checkbox"/> No
Are any sources within 100 feet of hazardous waste facilities operated by large quantity generators and treatment, storage, and disposal facilities regulated under the Arizona Hazardous Waste Management Act, A.R.S. § 49-921 et seq?	<input type="checkbox"/> Yes <input type="checkbox"/> No
Are any sources located within 100 feet of a drywell*?	<input type="checkbox"/> Yes <input type="checkbox"/> No
Are any sources located within 100 feet of a condition that can constitute an environmental nuisance*?	<input type="checkbox"/> Yes <input type="checkbox"/> No
If yes to any of the above questions, list which source it applies to: (Attach additional paper to form if more room is needed)	
Have all the Sources contributing to the system been evaluated?	<input type="checkbox"/> Yes <input type="checkbox"/> No

**Part 3: Certification**

I have reviewed the RTCR quarterly monitoring fact sheet and understand the monitoring requirements if the system is approved for quarterly routine monitoring. (Not required if choosing to stay on monthly monitoring)

I certify that the above information provided on this application to the best of my knowledge, is complete and correct, and has been verified to the fullest extent possible.

I certify the well(s) are currently installed as permitted and that all components function as intended and are in good condition.

Name of System Owner/Representative	Signature	Date

# Reduced Quarterly RTCR Monitoring Application

## Appendix A: Definitions

**"Dry well"** means a well which is a bored, drilled or driven shaft or hole whose depth is greater than its width and is designed and constructed specifically for the disposal of storm water. Dry wells do not include class 1, class 2, class 3 or class 4 injection wells as defined by the federal underground injection control program (P.L. 93-523, part C), as amended.

**"Environmental Nuisance"** means:

- A condition or place in populous areas which constitutes a breeding place for flies, rodents, mosquitoes and other insects which are capable of carrying and transmitting disease-causing organisms to any person or persons.
- A place, condition or building which is controlled or operated by any governmental agency, state or local, and which is not maintained in a sanitary condition.
- Sewage, human excreta, wastewater, garbage or other organic wastes deposited, stored, discharged or exposed so as to be a potential instrument or medium in the transmission of disease to or between any person or persons.
- A vehicle or container which is used in the transportation of garbage or human excreta and which is defective and allows leakage or spillage of contents.
- The maintenance of an overflowing septic tank or cesspool, the contents of which may be accessible to flies.
- The pollution or contamination of any domestic waters.
- The use of the contents of privies, cesspools, or septic tanks or the use of sewage or sewage plant effluents for fertilizing or irrigation purposes for crops or gardens except by specific approval of the department of health services or the department of environmental quality.
- The storage, collection, transportation, disposal and reclamation of garbage, trash, rubbish, manure and other objectionable wastes other than as provided and authorized by law and rule.
- Water, other than that used by irrigation, industrial or similar systems for non-potable purposes, which is sold to the public, distributed to the public or used in production, processing, storing, handling, servicing or transportation of food and drink and which is unwholesome, poisonous or contains deleterious or foreign substances or filth or disease-causing substances or organisms.

**"Excessive leakage"** means any amount of leakage which is greater than that permitted under the AWWA Standard applicable to the particular pipe material or valve type.
