

Nationwide Permits Available in Arizona

In 2021, the U.S. Army Corps of Engineers reissued the Nationwide Permits (NWP) as part of their five year renewal schedule for general permits. In response, ADEQ conditionally certified many of the NWPs and waived the rest. In the table below:

- **n/a** indicates that the activity is not available in Arizona (pursuant to Section 10 of Rivers and Harbors Act).
- **CC** indicates that the activity is conditionally certified if the project proponent follows the conditions in the nationwide permit. If the receiving water is impaired, not-attaining, an OAW or a lake, a certification request to ADEQ is required. These are highlighted in blue below.
- **W** indicates that the activity was waived by ADEQ and a certification request / notification to ADEQ is not required.
