**Re: Energy Fuels Resources (USA) Inc. Pinyon Plain Mine Notification Pursuant to Aquifer
Protection Permit Number P-100333**

Dear Sir or Madam:

Pursuant to the Pinyon Plain Mine Aquifer Protection Permit ("APP") Number P-100333, Section 2.7.3 (1), Energy Fuels Resources (USA) Inc. ("EFRI") is providing this written 5-day notification regarding a Performance Level ("PL") exceedance for the Lined Mine Shaft Sump Water Level on June 28, 2026 as a result of wildfire activity (Butte Fire) and associated power outages near the mine.

In accordance with the Permit, Section 2.6.2.1.2 (1-5) EFRI was able to restore the water level in the sump at or below the performance level and will continue to evaluate the cause of the incident. In addition, as required by the Permit, EFRI will evaluate the cause of the PL exceedance and provide the results within 30 days.

EFRI's preliminary investigation indicates that the PL exceedance was due to complete loss of power to the mine site because of wildfire activity in the area. After consulting with Arizona Public Service and the U.S. Forest Service (USFS), the powerline was de-energized to provide additional safety precautions and minimize potential for additional ignition sources in the impacted area. In addition, due to mandatory evacuation orders issued by the USFS, standby personnel could not be dispatched to switch the power source (stand-by auxiliary power) and resume pumping of the water from the lined mine shaft sump in a timely manner.

If you should have any questions regarding this notice, please contact me at 303-389-4132 or Nick Martin at 303-389-4162.

Yours very truly,

ENERGY FUELS RESOURCES (USA) INC.
