FEASIBILITY STUDY (FS) WORK PLAN**

The Arizona Department of Environmental Quality (ADEQ) has completed the following two reports for the Highway 260 and Johnson Lane Water Quality Assurance Revolving Fund (WQARF) site located in Pinetop-Lakeside, Arizona:

1. The final remedial investigation (RI) report [Arizona Administrative Code R18-16-406(J)]. An RI is conducted to document the nature and extent of the contamination and the sources thereof; identify current and potential impacts to public health, welfare, and the environment; identify current and reasonably foreseeable uses of land and waters of the state; and obtain and evaluate any other information necessary for identification and comparison of alternative remedial actions. The final RI report includes the final remedial objectives report and responsiveness summaries regarding comments, issues and concerns raised during the community involvement process.
2. The feasibility study (FS) work plan to implement the FS [Arizona Administrative Code R18-16-404(C) (1)(d)]. An FS is conducted to identify a reference remedy and alternative remedies that appear to be capable of achieving established remedial objectives and to evaluate them based on the comparison criteria to select a remedy.

The Highway 260 and Johnson Lane WQARF site consists of a groundwater plume located in Pinetop-Lakeside, AZ. The Site is generally bounded by the alignment of Rhoton Lane to the north, the western boundary of the Blue Ridge High School to the east, Burke Lane to the south, and Rainbow View Drive to the west.
