Details

Durham Regional Landfill, LLC has applied for a Significant Amendment to add four liquid evaporation ponds. The lined, non-hazardous liquid waste and leachate evaporation ponds are designed to be approximately nine (9) acres in area with a maximum operating depth of six (6) feet. The proposed system is designed to achieve an average evaporation rate of approximately 39,000 gallons per day per pond, resulting in a combined estimated evaporation capacity of roughly 156,000 gallons per day. Liquid wastes will be conveyed to engineered, double-lined evaporation ponds for disposal through controlled phase transformation from liquid to vapor, consistent with APP performance and environmental protection requirements.
