Arizona Department of Environmental Quality
1110 W. Washington Street
Phoenix, AZ 85007

Subject: Permit Renewal for Air Quality Control Permit No. 70156
CEMEX Construction Materials South, LLC
CEMEX – Camp Verde Plant, Place ID: 17463

To Whom It May Concern,

CEMEX Construction Materials South, LLC (CEMEX) would like to renew Arizona Department of Environmental Quality (ADEQ) Air Quality Permit #70156.

Attached are the ADEQ Standard Permit Application Form, additional PTE Calculations Process Flow Diagrams and Equipment List. We have added an alternative operating scenario to include a portable crushing plant to the aggregate operations. The plant will be used to crush return concrete for a temporary period and will then move on to other CEMEX locations. No additional throughput modification is being requested. The facility will continue to operate under its existing throughput limitations.

Please feel free to contact me at (602) 228-8029 or via e-mail at rondeel.storms@cemex.com if you have any questions regarding this request.

Respectfully
