

**Army National Guard
Seeks Public Input on Proposed Plan
For Fort Tuthill Small Arms Range Impact Area MRS (AZHQ-005-R-01)**

The Fort Tuthill Small Arms Range Impact Area Munitions Response Site (MRS)/ AZHQ-005-R-01 was historically used by the National Guard for small arms training from 1928 through 1955. The Proposed Plan (PP) provides information on how the Army National Guard (ARNG) assessed munitions constituents (MC) and munitions and explosives of concern (MEC) in environmental media at the MRS and summarizes the multiple clean up alternatives considered, how the alternatives were evaluated, and the selection of the preferred alternative. The PP identifies Alternative 4: Focused Surface and Subsurface MEC Removal and Land Use Controls (LUCs) as the preferred remedial alternative for addressing MC and MEC in environmental media at the Fort Tuthill Small Arms Range Impact Area MRS. This alternative achieves the effective long-term results for ensuring the protection of human health, public safety, and the environment. The ARNG is required to issue a PP and seek public comment and participation on the preferred decision.

The PP summarizes information that can be found in greater detail in the Final Remedial Investigation Report, Feasibility Study, and other relevant documents that are available upon request. The ARNG encourages the public to review these documents to gain a more comprehensive understanding of the MRS and investigation activities that have been conducted. The public is invited to review and comment on the Fort Tuthill Small Arms Range Impact Area MRS PP. The ARNG will consider all written comments or requests for a public meeting received during the public comment period (20 August 2022 through 22 September 2022) and will accept comments by e-mail or postal mail. All comments and requests must include the name, address, and telephone number of the person commenting. A public meeting will be held, if requested, to review the information provided in the PP. Public input to the PP will be documented in a Responsiveness Summary Report that will be included in a Record of Decision that documents the selected remedial action.

Written comments may be submitted to the following address:

Mr. Rob Halla
Army National Guard Program Manager
Army National Guard Installations and Environment
111 S. George Mason Drive, Arlington, VA 22204-3231
