The Arizona Department of Environmental Quality (ADEQ) has received a Remedial Action Work Plan (the RAWP) for the Douglas-Pirtleville Soil Program Phase II VRP site. The RAWP addresses remediation of soil and was submitted in accordance with Arizona Revised Statutes § 49-175 and § 176.

Contaminants of concern associated with historic smelter operations consist of metals, specifically arsenic, copper and lead. The RAWP provides details on soil removal, replacement, and landscape restoration on properties where soil testing has shown metal concentrations exceeding risk-based cleanup levels.
