

# EPA WORK NOTICE

Field work for the Remedial Design of the Iron King Mine-Humboldt Smelter Superfund site will be happening from **March-August 2026**.

## No road closures are expected

Expect to see drill rigs, excavators, and other heavy equipment in residential and non-residential areas in and near the Iron King Mine and Humboldt Smelter Superfund site, on State Route 69 and in Prescott Valley on Fain Road.

### Some of the work includes:

- Drilling Borings
- Geophysical Surveys
- Test Pits
- Road maintenance

### Some of the reasons for this work include:

- Measure depth of contamination
- Gather info on characteristics of waste to assist with repository design
- Test local materials for use as backfill and cover for the repository

**Dust control measures will be used during this work**
