

RECYCLING TIPS

EDUCATE, DON'T CONTAMINATE!

METAL CANS & FOIL

Aluminum is one of the worlds most recyclable materials. Recycling aluminum saves more than **90 percent** of the energy required versus producing new material. When you recycle an aluminum can, it can be recycled and back on the shelf in **60 days or fewer**.

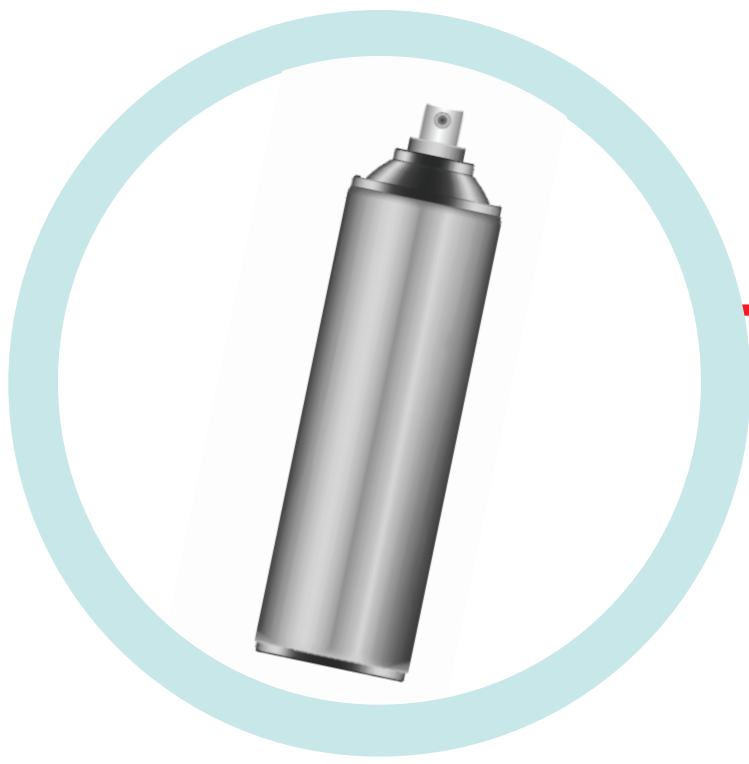

Drink Cans

Soft drinks and other beverage cans. Make sure they are empty before recycling.

Food Cans

Canned food and pet food cans. Make sure they are empty before recycling.

Empty Aerosols

Hygiene products and air fresheners. Ensure they are empty and do not squash or pierce them.

Foil Trays

Ready meals, pie trays and cooking trays. Empty and rinse them or wipe them clean before recycling.

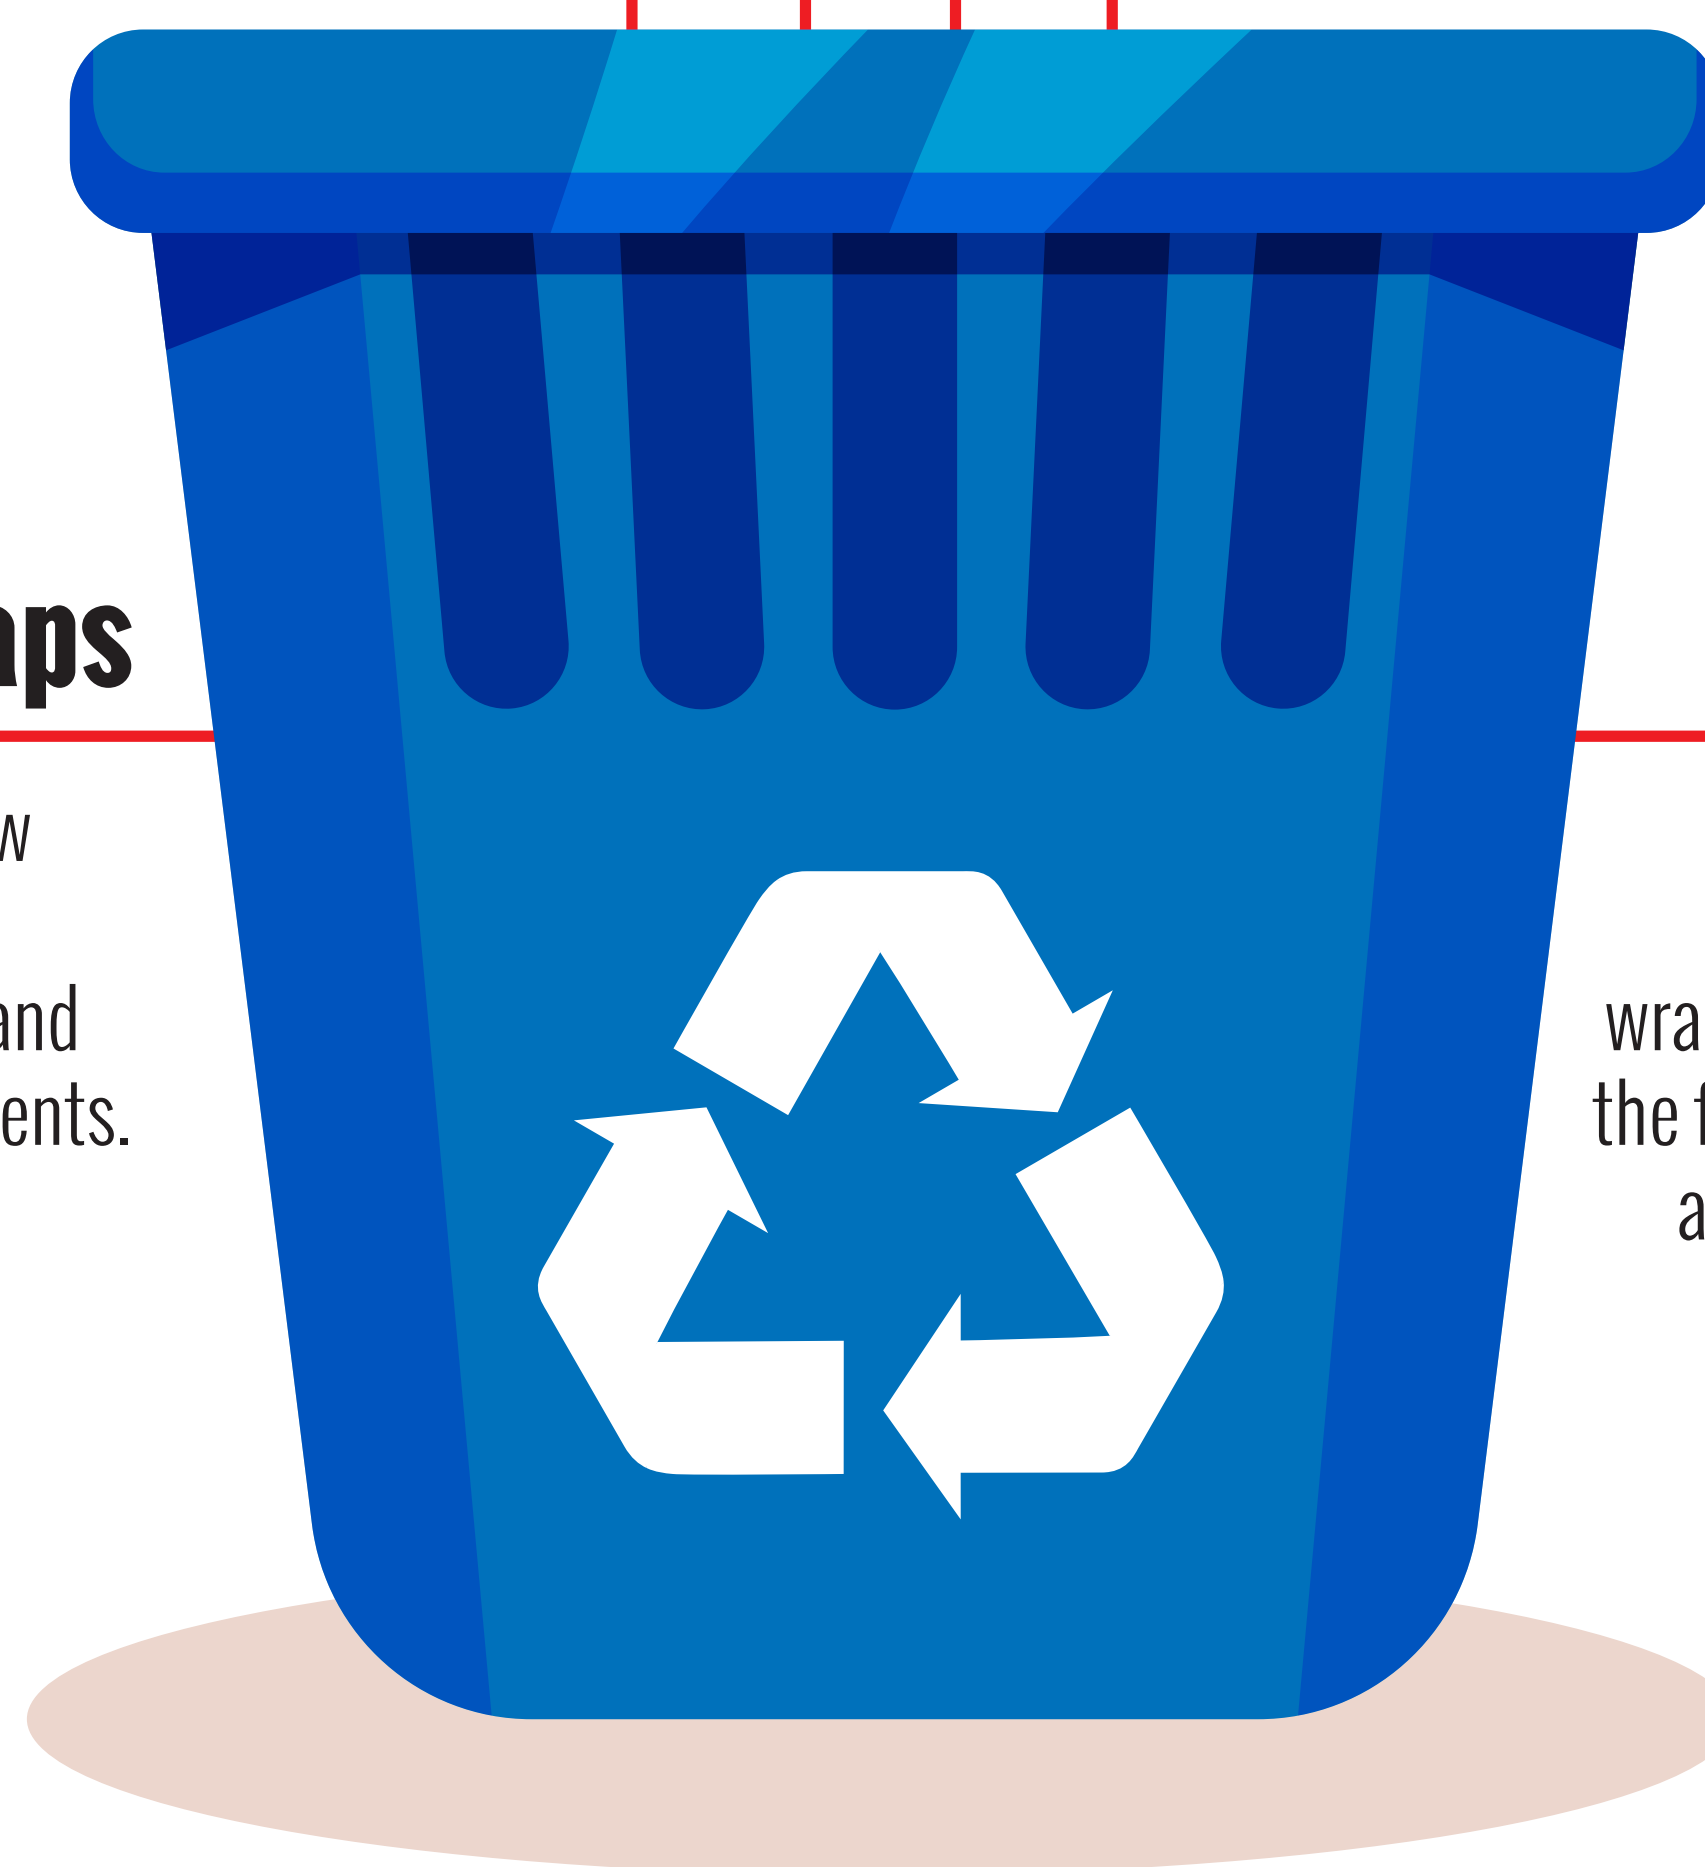

Bottle Caps

Aluminum screw caps found on bottles, drinks and cooking ingredients.

Wrapping Foil

Foil used for cooking/food wrapping. Make sure the foil is wiped clean and free from food residue.

CLEAN ALUMINUM ONLY IN THE BLUE RECYCLING BINS!
