

**NOTICE OF AVAILABILITY 16TH STREET AND CAMELBACK  
WATER QUALITY ASSURANCE REVOLVING FUND (WQARF) SITE  
FINAL REMEDIAL INVESTIGATION (RI) REPORT  
FEASIBILITY STUDY (FS) WORK PLAN**

The Arizona Department of Environmental Quality (ADEQ) has completed the following two reports for the 16th Street and Camelback Water Quality Assurance Revolving Fund (WQARF) site located in Phoenix, Arizona:

1. The final remedial investigation (RI) report [Arizona Administrative Code R18-16-406(J)]. An RI is conducted to document the nature and extent of the contamination and the sources thereof; identify current and potential impacts to public health, welfare, and the environment; identify current and reasonably foreseeable uses of land and waters of the state; and obtain and evaluate any other information necessary for identification and comparison of alternative remedial actions. The final RI report includes the final remedial objectives report and responsiveness summaries regarding comments, issues and concerns raised during the community involvement process.
2. The feasibility study (FS) work plan to implement the FS [Arizona Administrative Code R18-16-404(C)(1)(d)]. An FS is conducted to identify a reference remedy and alternative remedies that appear to be capable of achieving established remedial objectives and to evaluate them based on the comparison criteria to select a remedy.

The 16th Street and Camelback WQARF site consists of plumes located in Phoenix. The plumes are bounded approximately by Camelback Road to the north, Highland Avenue to the south, 17th Street to the east, and 15th Street to the west. Contaminants of concern at the site are tetrachloroethene, 1,2-dichloropropane and 1,2-dichloroethane.
