NOTICE OF AVAILABILITY OPERATION AND MAINTENANCE PLAN AND 30 DAY PUBLIC COMMENT PERIOD FOR THE 56th STREET & EARLL DRIVE WATER QUALITY ASSURANCE REVOLVING FUND (WQARF) REGISTRY SITE

The Arizona Department of Environmental Quality (ADEQ) has received an operation and maintenance plan (O & M Plan) for the Groundwater Remediation System for the 56th Street & Earll Drive WQARF site in Phoenix, Ariz. (A.A.C. R18-16-411(E)). The system is located along the northeast bank of the Grand Canal at approximately 34th Street and south of McDowell Road. The O & M plan has been submitted by Freescale Semiconductor, Inc., the working party for the WQARF site. The system extracts contaminated groundwater, removes volatile organic compounds using liquid-phase granular activated carbon, and discharges the treated groundwater into the Grand Canal.

The 56th Street & Earll Drive WQARF site consists of a contaminated groundwater plume bounded approximately by Earll Drive to the north, Roosevelt Street to the south, 56th Street to the east, and 28th Street to the west. The site boundaries provide the estimated extent of currently known contamination. The current contaminants of concern in the groundwater include trichloroethene (TCE) and tetrachloroethene (PCE). Contaminants of concern at the site may change as new data become available.

A copy of the O & M plan is available at the ADEQ Main Office, 1110 W. Washington St., Phoenix. Within 48-hour notice, an appointment to review related documentation is available Monday through Friday from 8:30 a.m. to 4:30 p.m. at ADEQ Records Management Center, 1110 West Washington Street in Phoenix.
