

Compliance Monitoring Data Portal (CMDP) Facility IDs

CMDP facility ID is specific to the type of sample being uploaded. If the wrong ID is used it will get rejected. The sample locations below are the compliance locations. Always follow your approved sampling plan. If water quality samples are taken from a different location it will not be considered for compliance.

Routine total coliform samples:

Sample Type: Routine

Facility ID: DS001

Sampling point: RTCR###

Analyte Codes: 3100- Coliform (TCR) and 3014- E. coli

Repeat total coliform samples:

Sample Type: Repeats

Facility ID: DS001

Sampling point: RTCR###, RTCR###UP, RTCR###DN

Analyte Codes: 3100- Coliform (TCR) and 3014- E. coli

Groundwater samples:

Sample Type: Triggered

Facility ID: 55-#####

Sampling point: RW001

Analyte Codes: 3100- Coliform (TCR) and 3014- E. coli

Lead and Copper samples:

Sample Type: Routine

Facility ID: DS001

Sampling point: DS001

Analyte Codes: 1030-Lead and 1022-Copper

IOC/SOC/VOC/RADS samples:

Sample Type: Routine

Facility ID: EPDS###

Sampling point: EPDS###

Analyte Codes: multiple

Point of Use (POU) sample:

Sample Type: Routine

Facility ID: DS001

Sampling point: DS001

Analyte Codes: multiple
