

Last Name	First Name	Question Asked Date/Time	Question Asked
Andersen	Tiffany	12:02:07 PM MST	Great!
Baker	Amy	12:41:40 PM MST	Thank you. Why did the author's for the HB believe this process was necessary. It seems involved and arduous.
Bazelman	Tracy	12:38:42 PM MST	
Bazelman	Tracy	12:41:03 PM MST	Thank you for that Jonathan.
David	Paul R	12:25:51 PM MST	In addition to water quality, will the pending program also control the quantity or flow of water?
David	Paul R	12:27:39 PM MST	Will there be agricultural exemptions for irrigation tailwater and runoff?
David	Paul R	12:31:03 PM MST	Water quality, i.e. insecticides, fertilizer and turbidity/sediments in agricultural outflows.
Doskocil	Cynthia	12:33:58 PM MST	Will seasonal waters be included in surface water protections?
Erickson	Luke	12:02:21 PM MST	Sounds great!
Flake	Will	12:02:21 PM MST	Sounds great! Has ADEQ reached out to other AZ state agencies to see what studies they have that might help with valuation? We are aware of several studies from AGFD that would probably be useful.
Hartline	Hilary	12:27:15 PM MST	We will send you some that we are aware of, but strongly encourage ADEQ to reach out to state agencies since I'm sure there are others that we are not aware of.
Hartline	Hilary	12:29:27 PM MST	
Hinson	Robert	12:02:22 PM MST	Sound is good.
Hollander	Robert	12:02:12 PM MST	Sounds good.
Hollander	Robert	12:26:24 PM MST	The reports provide a lot of information. I think most of us are still trying to digest or get our hands around the reports.  Under Modeling Elements in McClure Report #1, I am not sure I agree with the order of Categories and Subcategories. I see two major categories of water quality requirements. Those being health-based and wildlife & aquatic-based requirements. McClure has included fish consumption under Environmental, where I think fish consumption is a health-based concern. I just don't follow all of McClure's listing. I am still reviewing these reports. I will submit further comments by email.
Hollander	Robert	12:32:51 PM MST	
Hollander	Robert	12:37:45 PM MST	
Hollander	Robert	12:38:46 PM MST	Thank you for doing this. I know it is challenging.
Kring	Jo Lynn	12:02:17 PM MST	sounds good
Mattox	April	12:27:13 PM MST	How will special cases be handled? As in, will there be individual determinations be made on streams, lakes, etc. that a municipality thinks should be included but is not based on the model.
Mattox	April	12:28:36 PM MST	
Mattox	April	12:29:08 PM MST	Or thinks that should be excluded but the model has included.
Railsback	Meghan	12:02:12 PM MST	sounds good to me
Ross	Stuart	12:02:08 PM MST	yes one of slides mentioned "12 studies," can you reference a page number of the technical paper or the McClure report where these 12 studies are listed?
Sheldon	Megan	12:27:09 PM MST	On page 7 of the technical paper, affected parties include WWTPs. Why were water treatment plants excluded when they may rely on the protected surface water as a drinking water source?
Sheldon	Megan	12:38:39 PM MST	
Sorensen	Marcia	12:02:06 PM MST	Sound is great!
Thomas	Scott	12:33:59 PM MST	You've talked a bit about estimating benefits, which is always challenging. With respect to the other required piece of the analysis, at a big picture level, what sort of things does ADEQ expect to analyze in terms of estimating costs of listing waters or setting standards at particular levels?
