

Question Asked

How soon does ADEQ think the rulemaking will be finalized?

Johnathan were you saying that ADEQ is limited in how it can... provide guidance/rules on BMPs upland from the discharge to non-WOTUS? (I may have misunderstood.)

ADEQ in order to properly protect surface waters (or whatever area of environmental protection is under consideration)?

(to bridge that gap)

*bridge

Is ADEQ planning on another couple meetings like this to keep stakeholders updated?

Does "done" with the rule mean acted upon by the Governor's REgulatory Review Council?

When are coments due? Just got involved in this topic. thx.

Thank you for holding this.

feedback to?

activities. Will the BMPs become conditions in CGPs issued to projects adjacent to or in non-WOTUS Protected Surface Waters (AZPDES CGPs issued under the Surface Water Protection Program)? Or will the BMPs be included in some other type of general permit? If not a permit, how will ADEQ enforce BMPs? Will the BMPs be included in a permit (e.g. AZPDES CGP) or some other mechanism?

would appear many of BMPs that work for 404 approved projects would work for the types of projects addressed here. So USACE Guidance may be helpfu..

Link to technical paper? Not intuitive to find on website, thanks.

AZPDES@azdeq.gov?

has been received.

Is there an AZDEQ page dedicated to this subject that contains all the information? Can you send the link to the group that signed up for this presentation?
